<u>Reading</u> – read the article to yourself and then aloud. Try not to insert filler words such as "um", "ah," "like". Our goal is to reduce filler words in everyday conversation.

Nachos were invented by Ignacio "Nacho" Anaya in the small Mexican town of Piedras Negras in 1943. Ignacio was working at a restaurant called the Victory Club when a group of U.S. military wives visited. As the story goes, they wanted a snack, and Ignacio quickly improvised. He used fried tortilla chips, added melted cheddar cheese, and sliced jalapeño peppers. He named the dish "Nacho's Especiales" after himself, and it became an instant hit.

The first nachos were simple but delicious, consisting of just three main ingredients: crispy tortilla chips, melted cheddar cheese, and a little kick of heat from the jalapeños. Ignacio's invention became so popular that it eventually spread throughout Mexico and across the border into the United States, evolving into the nachos we know and love today.
